HARDY PERENNIAL PLANTS

QUALITY

My plants are field grown; that is, they are grown out of doors from start to finish (I have no greenhouse). They have been in the ground all winter; consequently there is no question as to their hardiness, and they may be planted out as soon as the ground is dry enough, the earlier the better; late frosts will not harm them at all.

Having been grown from the best strains obtainable from European and American plantsmen, my plants are unsurpassed in quality.

All plants sent out are of blooming size.

PLANTING DIRECTIONS

Description as to height, color and time of blooming, suitable soil and aspect, and other information necessary for proper planting, is attached to all plants. If further information is desired, I am always glad to answer any questions.

ROCK PLANTS

The plants marked (R) are especially suitable for rock gardening.

SHIPMENT

Unless directed otherwise, plants will ordinarily be sent by express, the customer paying the carriage charges. If desired by parcel post, ten per cent should be added to the remittance. Any balance will be refunded.

TERMS

This price list cancels all previous quotations.

Not less than six plants of one variety are sold at the dozen rate; not less than fifty plants of one variety are sold at the 100 rate.

New customers will kindly send remittance with order. If credit is desired, please send references and allow me time to hear from them.

ACONITUM (Monkshood)

Per doz.

Per 100

Handsone, very dark green glistening foliage; three foot spikes of rich, dark blue flowers through September and October. Needs very rich soil and does better in shade than in sun. Stake early. If it sends up too many flower stalks, thin them out rather than divide the clumps often, as it recovers slowly after division....\$3.50 \$25.00

ANCHUSA

ITALICA. 3 feet. Quantities of small, brilliant blue flowers in May. Needs rich, light soil, a shady place and early staking. Self sows profusely.\$3.50 \$25.00

(R) MYOSOTIDIFLORA. A most valuable plant of recent introduction. For the front of a shady border or for the rock garden it cannot be surpassed. It grows about a foot high, and very early in spring, at the same time as the leaves appear, it throws up quantities of flowers exactly like forgetmenots and with all the charm of those well loved flowers. As the foliage slowly expands, the beauty of the large, dark green leaves appears; all summer long they remain an ornamental feature of the garden. The plants are very hardy, and easy to grow. They need rich soil, good drainage and part shade. Field grown clumps.....\$5.00 \$35.00

ANTHEMIS (Golden Marguerite)

TINCTORIA KELWAYII. A fine border plant, forming a bush three feet high covered with golden yellow flowers. Has a long blooming period from June on. Needs a sunny position.....\$2.50 \$18.00

AQUILEGIA (Columbine)

MRS. SCOTT ELLIOTT'S LONG SPURRED HYBRIDS.....\$3.50 \$25.00

SUTTON'S LONG SPURRED PINK SHADES.....\$4.00 \$30.00

SUTTON'S LONG SPURRED BLUE SHADES.....\$4.00 \$30.00

SUTTON'S LONG SPURRED PURE WHITE.....\$4.00 \$30.00

(R) ALPINA\$4.00 \$30.00

MRS. NICHOLLS. A very beautiful long spurred Columbine, with large, soft blue and white flowers.....\$5.00 \$35.00

ASTER

(R) ALPINUS. Large, single lavender flowers in May. Sandy soil and shade.....\$3.00 \$20.00

(R) SUB-COERULEUS. Very much the same as Alpinus but the flowers are paler blue.....\$3.00 \$20.00

NOVAE ANGLIAE "Barr's Pink." The finest of the Michaelmas Daisies. Five feet. Quantities of large, semi-double pink flowers in September and October. Requires rich soil, plenty of moisture and some shade. Should be divided every year and grown to one stem.....\$3.50 \$25.00

ASTILBE (Spirea)

Valuable plants which ought to be used much more freely than they are. They are very hardy, the foliage is magnificent, and the great plumes of flowers, standing three to four feet high in June and July, are equally beautiful. The only thing they are particular about is to have plenty of water during the blooming season. A rich, heavy moist soil suits them best.

QUEEN ALEXANDRA. June flowering. Pink.

PEACH BLOSSOM. Flowers in July. Light pink.

GLORIA. July flowering. Deep pink.

GLADSTONE. Pure white. Early.

	Per doz.	Per 100
All Astilbes.	\$5.00	\$35.00

BOLTONIA

ASTEROIDES. Five to six feet tall, gray green foliage and masses of small aster-like white flowers late in August. So easily grown and increases so rapidly that it is not appreciated as it should be.

\$2.50	\$18.00
--------	---------

CAMPANULA (Bellflower)

PERSICIFOLIA (Peach Bells). The finest member of this large and very lovely family. Its outstanding characteristic is the remarkably clear, pure color and delicate texture of the flowers which in June and July thickly cover the three foot stalks with large bells of lavender blue. They associate beautifully with Delphinium and with pink Sweet William, and are splendid for cutting as every bud will open out in water. They do best with some shade and in rich, rather heavy soil, with lime.....

\$3.00	\$20.00
--------	---------

COREOPSIS (Tickseed)

Golden yellow flowers, blooming all summer.....

\$2.50	\$18.00
--------	---------

DIANTHUS (Hardy Pinks)

All the pinks are good rock plants. They need sun and must not be planted so deep that the crowns are smothered. If these two points are observed, they are perfectly easy and will repay the grower with a wealth of blossoms.

BARBATUS. See Sweet William.

(R) DELTOIDES. Long sprays of pretty green foliage, covered with tiny rose colored flowers in June. 6 in.....

\$2.50	\$18.00
--------	---------

(R) PLUMARIUS. Gray foliage. Fragrant, rose colored flowers in May and June. One foot.....

\$2.50	\$18.00
--------	---------

SUPERBUS. The foliage is bright green. The flower stalks are erect and bear masses of fragrant, deeply fringed flowers of delicate lavender. 18 in.....

\$3.00	\$20.00
--------	---------

DELPHINIUM (Larkspur)

BELLADONNA. Three feet. Sky-blue flowers with white eye, in June.....

\$3.00	\$20.00
--------	---------

CHINENSIS, "Blue Butterfly". Eighteen inches. Bears brilliant, dark blue flowers from July through the summer.....

\$2.50	\$18.00
--------	---------

DIGITALIS (Foxglove)

Per doz. Per 100

LUTZ HYBRIDS and SUTTON'S GIANT PRIMROSE. No plants until the autumn.

DICENTRA SPECTABILIS (Bleeding Heart)

An old fashioned plant which has "come back" with all its old attraction. It is very lovely with its beautiful foliage and graceful racemes of bright rose colored flowers, so that, apart from the sentimental value it has for most of us, it is a valuable addition to the shady side of the garden.....Each, 75 cents. \$7.50

DORONICUM (Leopard's Bane)

CLUSII. A charming, golden yellow daisy, one of the first flowers to appear in the spring.....\$5.00

EUPATORIUM

COELESTINUM (Hardy Ageratum). Masses of lavender blue flowers from the end of August through the autumn. Two feet high. It is very valuable for providing fine color effects in the autumn garden.\$3.00 \$20.00

GAILLARDIA (Blanket flower)

Showy, enormous flowers, copper red with yellow border. One of the few perennials that bloom all summer long. Rather too barbaric for garden decoration but a most effective flower for cutting. Light soil and sun. Divide every spring.....\$3.00 \$20.00

HYACINTHUS CANDICANS (Summer hyacinth)

Lily-like foliage, sending up three to five foot stalks covered with snowy white bells in August. The bulbs should be planted eight inches deep in rich ground. They may be lifted in the autumn and stored in the cellar. If they are left in the ground they should be well covered with three or four inches of peat moss or coal ashes. A valuable plant not as well known as it should be.....\$2.50 \$18.00

LYCHNIS (Jerusalem Cross)

ARKWRIGHTII. A hybrid lychnis, two feet high, with brilliant flowers in shades of red, scarlet and orange.....\$3.00 \$20.00

MYOSOTIS (Forgetmenot)

(R) ALPESTRIS. Sutton's Royal Blue.....\$2.50 \$18.00

NEPETA MUSSINI

(R) A beautiful and easily grown trailer for the rock garden or edge of the border, with masses of lovely gray foliage and small lavender flowers.\$2.50 \$18.00

OENOTHERA (Evening Primrose)

	Per doz.	Per 100
FRASERI. Yellow flowers in June. Two feet high.....	\$3.00	\$20.00
(R) MACROCARPA. A trailer bearing enormous golden yellow flowers.	\$3.00	\$20.00

PHLOX

PANICULATA. The great standby of the garden in midsummer, providing the last great show of brilliant color for the season. To get the best out of phlox it should be planted in groups of not less than six plants, in rich soil, and kept well watered. The flowers last longer in some shade and should never be allowed to go to seed. After three years the clumps should be divided, or else they may be thinned after they start in the spring, allowing only three or four stalks to a clump. This will result in much finer flower heads.

Deutschland. Scarlet with crimson eye.....	\$3.00	\$20.00
Enchantress. The same soft salmon pink as Elizabeth Campbell, but a more vigorous grower.....	\$3.50	\$25.00
Hindenburg. Crimson with darker eye.....	\$3.00	\$20.00
Milly von Hoboken. Clear, bright pink. Very large flower.....	\$3.00	\$20.00
Rheinlander. Salmon pink with deep red eye.....	\$3.00	\$20.00
Thor. Deep, glowing salmon pink.....	\$3.00	\$20.00
Wanadis. Light violet.....	\$3.00	\$20.00

PHYSOSTEGIA (False Dragonhead)

VIRGINICA. Three to four feet high, with spikes of delicate pink flowers in August. Fine for cutting. The only fault of this plant is that it spreads too rapidly. It should be divided every year without fail.....	\$2.50	\$18.00
--	--------	---------

PLATYCODON (Balloon Flower)

(R) MARIESII ALBA. Eighteen inches. Very large flowers of a beautiful clear white from July on to frost. Rich loam and lime and a shady position suit it. It should not be moved after it is once planted, and care should be taken in the spring not to disturb it, as it does not appear until long after every other plant is up.....	\$3.00	\$20.00
--	--------	---------

POLEMONIUM (Jacob's Ladder)

COERULEUM, "Prima Donna." Eighteen inches. Light blue flowers in May. Good for cutting.....	\$3.00	\$20.00
---	--------	---------

POTENTILLA (Cinquefoil)

(R) NEPALENSIS, "Miss Willmott." A splendid plant for the front of the border and better for the rock garden. The silvery foliage, exactly like strawberry leaves, remains in good condition all summer and is always beautiful. The flowers, not large but very brilliant, are red with golden centres.....	\$3.50	\$25.00
--	--------	---------

PRIMULA VERIS ELATIOR (English Oxlip)

(R) All the primrose family are lovely and doubly welcome because the bright flowers come so early in spring. They need rich, heavy soil, shelter from the hot sun of summer, and, most essential, plenty of water. They should be divided every year after flowering.\$3.00 \$20.00

PYRETHRUM ROSEUM (Painted Daisy)

Large, daisy-like flowers of beautiful clear rose, borne singly on long stems in May and June. Splendid for cutting. The plants should be left to grow into large clumps and then divided in August, not in the autumn. A rich, rather heavy loam, with lime will suit them, and the flowers will keep their color better in a shady position.\$3.00 \$20.00

SCABIOSA (Pincushion Flower)

CAUCASICA. The large flowers, two and a half to three inches across, are in lovely soft shades of lavender, are borne singly on eighteen inch stems, and last from July until heavy frost. One of the finest flowers we have for cutting. The plants are very easily grown, but need full sun and plenty of lime; also frequent division in spring.....\$3.50 \$25.00

JAPONICA. Handsome, finely cut foliage, with masses of lavender flowers in July.....\$3.00 \$20.00

SALVIA (Meadow Sage)

TENORII. Two feet high, with handsome dark green foliage, and spikes of violet flowers in June. Needs sun and light soil.....\$3.00 \$20.00

SIDALCEA (Greek Mallow)

HYBRIDS. A fine perennial, not known as much as it might be. One of my customers said of it, "That was the prettiest thing in my garden in July." Growing three to four feet high, the flower stalks are thickly covered with clear pink flowers like small hollyhocks. Very hardy and easy to grow, needing no staking.\$3.50 \$25.00

SPIREA (See Astilbe)

STATICE LATIFOLIA (Sea Lavender)

(R) The dark green, leathery foliage lies flat on the ground. From the centre rise many branches of tiny lavender flowers, giving the same misty effect as baby's breath.....\$3.00 \$20.00

SWEET WILLIAM

Sutton's Pink Beauty. A beautiful shade of salmon pink.....\$2.50 \$18.00

STOKESIA (Cornflower Aster)

(R) An effective native plant, one foot high, with good foliage and handsome lavender flowers three to four inches across, coming into bloom in July and lasting for the rest of the summer. Sun and sandy soil.....\$3.00 \$20.00

THALICTRUM ADIANTIFOLIUM

(Maidenhair Meadow Rue)

	Per doz.	Per 100
The foliage closely resembling Maidenhair fern is the great beauty of this plant, although the long sprays of tiny yellow flowers are very charming and useful for cutting. Needs heavy soil and shade.	\$2.50	\$18.00

VERBASCUM (Mullein)

Harkness Hybrids. Splendid and stately plants, growing six to eight feet high, with golden yellow blossoms from July through the summer. They need full sun and light soil. Both this and Miss Willmott are biennials.....	\$3.50	\$25.00
--	--------	---------

Miss Willmott. Similar to the foregoing but the flowers are white with a golden centre.....	\$3.50	\$25.00
---	--------	---------

Wiedemannianum. Three feet high, with graceful stems of violet flowers in July.....	\$3.00	\$20.00
---	--------	---------

VERONICA (Speedwell)

A beautiful family of plants and easily grown. Given sun and good drainage, they will thrive and increase luxuriantly. They are all good for cutting as the flowers last a long time in water.

(R) AMETHYSTINE. Long trailing stems with spikes of soft blue flowers in June. Eight inches high.....	\$3.00	\$20.00
---	--------	---------

SPICATA. Two feet high. Spikes of blue flowers.....	\$3.00	\$20.00
---	--------	---------

VIRGINICA. Four feet. White flowers.....	\$3.00	\$20.00
--	--------	---------

VIOLA

(R) JERSEY GEM. Easily the most valuable viola for American gardens because it will not only live but flourish through the hot summers that are death to most of the family of violas. The large purple flowers are borne on long stems in great profusion, making a mass of beautiful color in early spring. The display keeps up for a long time if the flowers are not allowed to go to seed, and after a slight let up in July and August, starts again in the cool days of autumn.

My stock came from the originator, Mr. T. A. Weston, and my plants are grown from divisions, so they are absolutely true to type, which could not be the case if the plants were grown from seed.	\$3.00	\$20.00
--	--------	---------

(R) SUTTON'S APRICOT. A beautiful soft apricot, with brilliant orange centre. The loveliest viola in existence.....	\$3.50	\$25.00
---	--------	---------
